Activities and Interests

Mycology, Conservation, Programming,
Glass Art

BACKGROUND

Thank you for taking the time to learn about myself and my skills, please reach out if you have any questions.

Although I find JavaScript to be my language of choice so far, I enjoy the challenge of learning something new. I am also comfortable with both SQL and NoSQL database management as well as MERN stack web development. I also have practical clinical database experience as well as practice maintaining Qiagen nucleic acid purification robots in a laboratory setting.

I have used both ArcGIS and ArcMap for model-building and geostatistical analyses projects and I am always interested in learning skills with new software.

I have a special interest in mycology and spend my free time on forays where I photograph fungi and catalog them in my developing showcase project – see it in my portfolio.

EDUCATION

University of Central Florida • Bachelor of Science - Environmental Studies
Geographic Information Systems • Certificate
Full-Stack Web Development • Certificate

EXPERIENCE

Genesis Biotech – Medical Diagnostics Laboratories - Lab Assistant (Current)

Brevard County Enchanted Forest, Brevard County, Florida - Volunteer
